GROUP 4

GROUP CONTRACT

Everything we do will be based on proper communication and approval. This will decide the protocol for group meet timing and how work is to be distributed and finished. We want to keep the team contract flexible as things can change throughout the tenure of the project. However, we must agree on a few things before the start of the project so that the project can be successfully completed without any interruptions or confrontations.

A. Commitment:

As a project team we will:

1. All equally share and contribute to the project.
2. Focus on what is best for the project.
3. Review and approve any changes we see fit for the project.
4. Adapt to the dynamic responsibilities that come along different stages of the project.

B. Participation:

We will:

1. Encourage a diversity of opinions.
2. Be open to new approaches and listen to new ideas.
3. Discuss and rectify the work when things go wrong without blaming anyone.

C. Communication:

We will:

1. Schedule meet timings considering everyone's preferable timings.
2. Agree to show up to the group meeting on time.
3. Keep other group members informed from time to time.
